

CS4 & UP

IMPORTANT LAYERS PANEL OPTIONS

MAMA SHAN'S ACTIONS FOR PHOTOSHOP

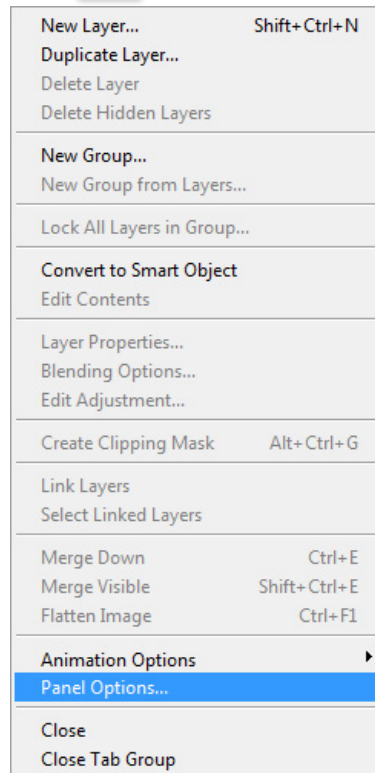

1. Click the flyout options tab, at the top right of the Layers Panel .

2. Select Panel Options, to open the Layers Panel Options dialog box.

3. In the Layers Panel Options dialog box, make sure the following options are checked –“Entire Document” & “Use Default Masks on Fill Layers.”

Example here is from CS5. These options are located here in CS4, too.

Versions of the default Layers Panel Options prior to CS4 do not need adjusting.

INSTRUCTIONS FOR OPERATION

IMPORTANT

For Mac & Windows users--
These options should be set in Photoshop® before running any of Mama's Actions to ensure optimum performance. These are “sticky” settings, so you should have to do this only once. Exception would be if you had to re-install Photoshop® or delete the Prefs file; then you would have to check these Layers Panel Options, again.
